Public Health Reporting

Stage One Meaningful Use

- Vehicle to the KY Immunization Registry for submission of immunization messages
- Syndromic Surveillance/ADT monitoring and route to BioSense
- Reportable Labs/Diseases – Lab results filtering to NEDSS
- Labs must be LOINC'd

Stage Two Meaningful Use

- Immunizations
- Syndromic Surveillance
- Reportable Labs/Diseases
- Submission to the Cancer Registry

Patient/Consumer Engagement

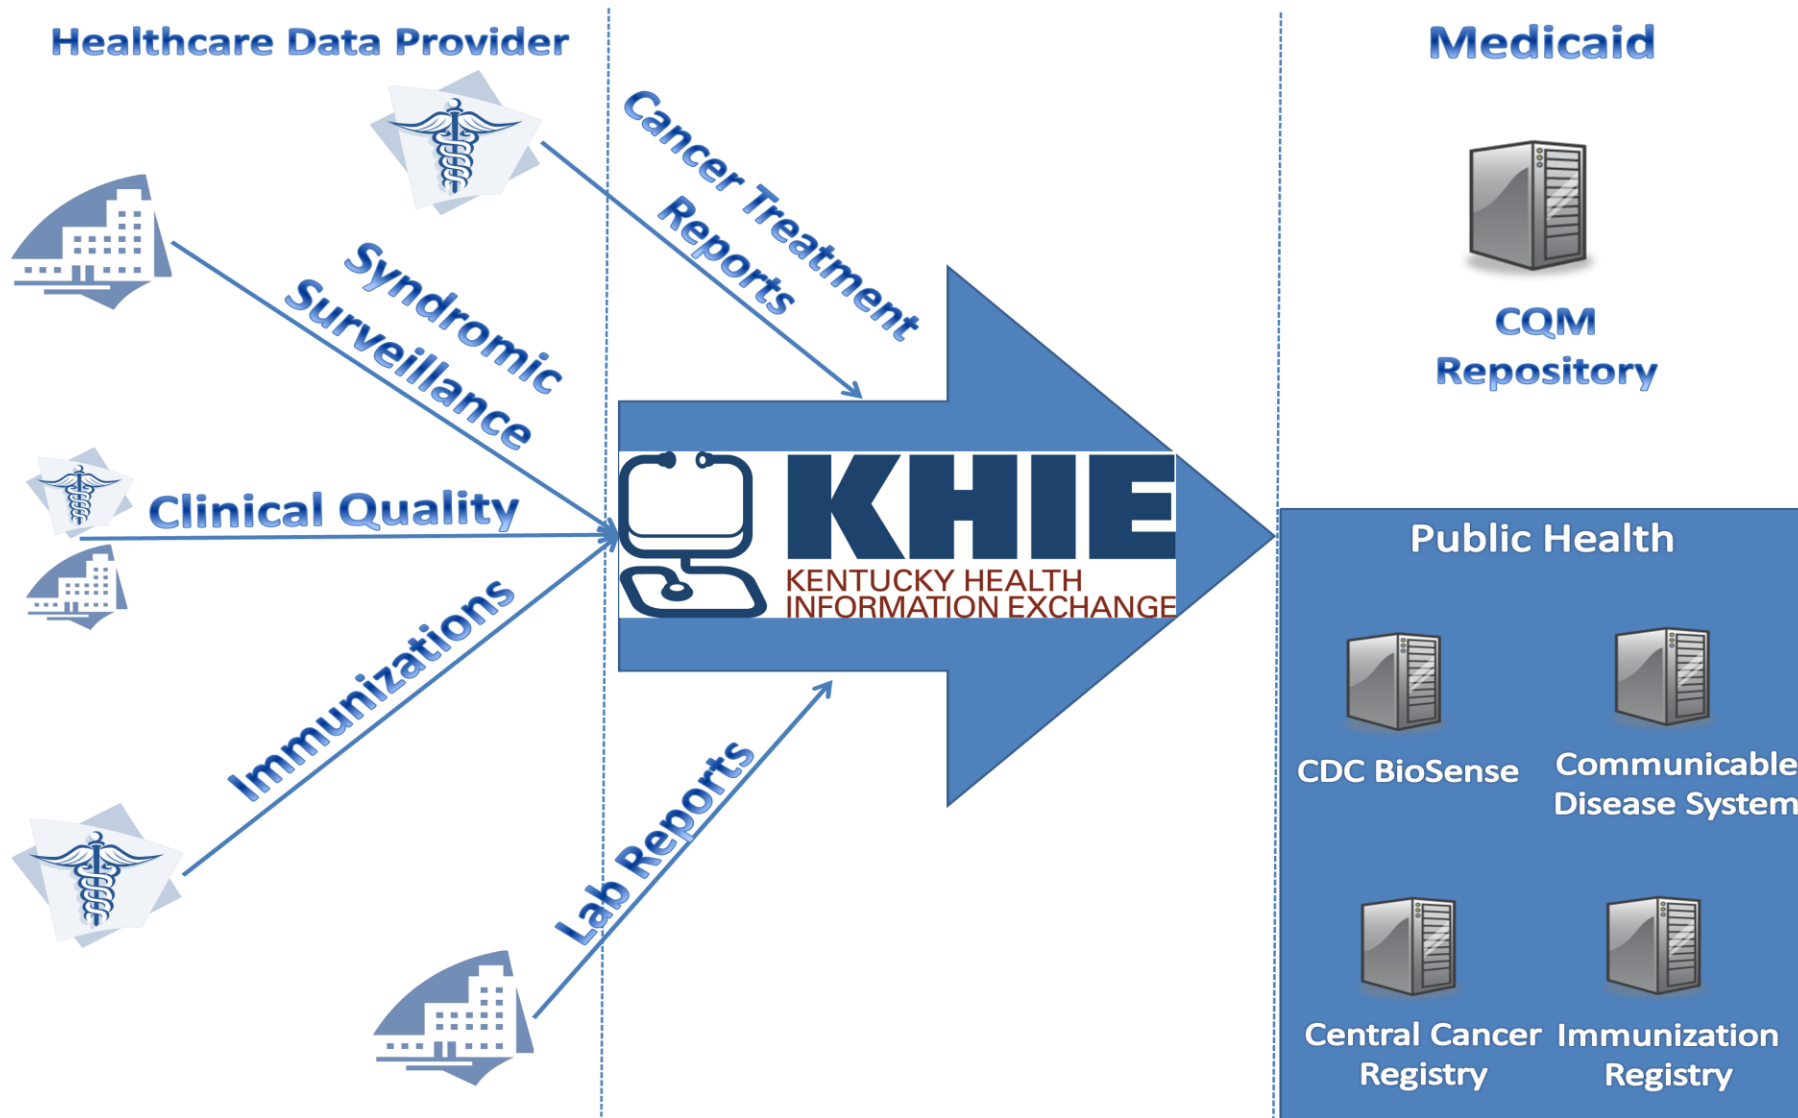

- Patients required to access, view and download their clinical information
- KHIE will implement Patient Portal/PHR in 2013

Transitions of Care

- Requires Consolidated CCD/CDA from the provider's EHR
- Must be transmitted to unaffiliated provider and receipt acknowledged
- Submission of CCD/CDA to KHIE can meet the objective
- KHIE will implement secure clinical messaging in 2013 (DIRECT)

eHealth Exchange Vision / Mission

Vision

- To serve as a critical element of the nationwide health information infrastructure; and
- To improve the health and welfare of all Americans through health information exchange that is trusted, that scales, and enhances quality of care and health outcomes by supporting comprehensive longitudinal health records.

Mission

- To expand trusted, secure and interoperable exchange of health information across the nation by providing shared governance and necessary shared service to public and private organizations who wish to interconnect as a network of networks.

communications

“Managing family health records is a challenge”

Instead of filling a file folder with medical information or creating a makeshift spreadsheet, get a handle on your health. You can easily compile and manage family medical records, and send those records to your physician before your next medical appointment.

You can be in control of your health records

You decide what information goes in, what stays out, and who to share your records with. You can direct your health information to your doctor, clinic or hospital.

Instead of struggling to recall medications and remember past illnesses in the waiting room, you can create your record from the comfort of home. You can then provide your medical contacts with a more legible, accurate and complete picture of your health – contributing to improved communication and coordination of care, and reducing the chance of medical errors, duplicate tests and unnecessary costs.

How is Consumer Engagement Being Supported by KHIE?
